

JB30

:: Product Description

- * The JB30 is a rugged gooseneck microphone, for all kinds of applications:
 - * Conferences, meetings
 - * PA installations
 - * Teachers
 - * …
- * The 30cm long gooseneck can be bended in all directions
- * The on/off switch in the base of the microphone makes it a perfect choice for conference installations.
- * Thanks to the male XLR-connector the JB30 can be easily installed on a desk and/or audio mixer.
- * The unidirectional pickup pattern of the microphone isolates unwanted ambient noises and prevents early feedback.
