

ERSA Independent 75 "Basic Set"

Maximum independence with the multifunctional Ersa gas soldering set! Mobile power - wherever you may need it! Efficient, with a wide range of high quality accessories, small, handy and a convenient packaging: this gas soldering set is very versatile! The ergonomic antistatic gas soldering iron with piezo ignition is the perfect tool for service and maintenance work - especially when there is no electric power supply available.

With its infinitely variable power rating from 15 up to 75 watts (compared with electrical soldering irons) max. soldering tip temperatures of 500°C can be achieved. The Independent 75 operates on commercially available butane lighter gas.

The Independent 75 "Basic Set" is supplied in a practical transport case, consisting of a gas soldering iron with pre-installed catalytic soldering tip, a spare tip and a sponge container with cleaning sponge.

More accessories are available like soldering tips, flame nozzle, hot gas nozzle, hot blade and deflector to shrink heat-shrinkable sleeves.

Power rating (Watt)	75
Preheating time (in seconds)	46
Max. temperature	580
Soldering tip diameter / width (mm)	2,40
Weight (g)	0,273
Operational time with one filling	60
Ignition	Piezo
