

## DS3231 Real Time Clock Modul für Raspberry Pi

|                  |               |
|------------------|---------------|
| Artikel-Nr.:     | RPI-RTC       |
| Hersteller:      | Sertronics    |
| EAN:             | 4251266700746 |
| Herkunftsland:   | China         |
| Zolltarifnummer: | 84733020      |
| Gewicht:         | 0.003 kg      |

Real Time Clock / Echtzeituhr Modul für Raspberry Pi mit sehr hoher Genauigkeit.

### Technical Data:

- Raspberry Pi DS3231 high precision clock module.
- To provide continuous timing battery backup.
- Low power consumption.
- The device compatible with DS3231 encapsulation and function.
- Complete the clock calendar function including the second, minute, time, week, date, month, and year, and provide the valid until 2100 leap year.
- Two calendar clock.
- 1 Hz and 32.768 kHz output.
- Reset the output and input button to tremble.
- High speed (400 KHZ) the I2C serial bus.
- + 2.3 V to + 5.5 V power supply voltage.
- The accuracy of plus or minus 3 degree.
- digital temperature sensor.
- Net weight: 2 g / 0.07 oz.
- Size: 15 x 13 x 14 mm / 0.59 x 0.51 x 0.55 inch.
